

## JLG Forklift Part

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road expedition.

While on their journey, John spent time conversing with previous business contacts whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were visiting Hoover Dam- John uncovered a vast marketplace for a product that could promptly and securely lift individuals in the air to accomplish maintenance and other building functions.

After returning from their trip, John set up a business with two of his friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty personnel, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into current models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into many different global marketplaces and continues to cultivate contemporary equipment to ensure that clients are able to become safer and more well-organized within their workplace.
