Doosan Infracore America Lift Truck dealers successfully operate in over 220 service and product sales locations all through Canada and the U.S. The lift truck product line impressively includes 63 different machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these numerous truck designs vary from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing forklift company in the North American market, thanks to their reliability in maintaining a high level of consumer service quality and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. lift Truck division located in Cleveland has a expert team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Originally the domestic forklift marketplace in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled forklifts as part of a domestic machinery expansion venture. Product sales of these products were initially targeted to state-run firms, large scale organizations, and the military. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical education grew to become the new focus for improving quality and product development.

Domestic lift truck trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's advanced technological advancements combined with sales success placed them in a situation of substantial growth of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a joint venture project to assist them in the highly competitive North American materials handling market. This project proved highly lucrative for Daewoo and their forklift sales expanded greatly. In 1984, the company completed development of a new facility to help in producing high end value-added goods for export. In 1993, the company had a global sales system and started exporting versions they had developed through in-house expertise, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into international marketplaces.
